### SCHOLARLY PROFILE

---

My research goal is to better understand processes governing the distributions of atmospheric species, and their implications for air quality, public health, and climate. My research program combines **remote sensing**, **modeling**, and **data assimilation** techniques.

My **research interests** include: atmospheric chemistry and its implications, modeling of atmospheric chemistry, and observing trace gases from space.

### PROFESSIONAL EXPERIENCE

---

- 2019      Research Scholar, Harvard-Smithsonian Center for Astrophysics  
            Faculty Advisor: Gonzalo Gonzalez Abad, Physicist  
            Project: Developing operational formaldehyde products from the OMPS satellites
- 2017 – 2019      Post-doctoral Fellow, Harvard University  
                    Faculty Advisor: Daniel J. Jacob, Vasco McCoy Family Professor of Atmospheric Chemistry and Environmental Engineering  
                    Project: A comprehensive coupled model for tropospheric halogen chemistry

### EDUCATION

---

- 2016      Ph.D. in Environmental Science and Engineering, Harvard University  
            Thesis: Observing atmospheric formaldehyde from space: validation and implications  
            Advisor: Daniel J. Jacob
- 2011      MSci. in Environmental Science, Peking University  
            Thesis: Monitoring SO<sub>2</sub> emissions in China using satellites  
            Advisor: Yu Song
- 2008      B.S. in Environmental Science, Nankai University

## AWARDS & GRANTS

---

### Academic Recognition

Recognized reviewer for <i>Atmospheric Pollution Research</i>	2019
NASA/DOI William T. Pecora Team Award for OMI	2018
Outstanding reviewer for <i>Atmospheric Environment</i>	2017
NASA Group Achievement Award for SEAC <sup>4</sup> RS	2015
Graduate with honors, Nankai University	2008
Excellent All-round Student, Nankai University	2005 – 2007

### Teaching

Harvard University Certificate of Distinction in Teaching	2013
---	------

### Fellowships

Smithsonian Astrophysical Observatory Visiting Scientist Fellowship	2019
Harvard Graduate Consortium on Energy and Environment Fellowship	2014 – 2016
Graduate Scholarship, Peking University	2008 – 2010
Novozymes Fellowship	2007
China National Educational Opportunity Grant	2007
Undergraduate scholarship, Nankai University	2005 – 2006

## PRESENTATIONS

---

### Talks

- Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), University of Illinois at Urbana–Champaign, Champaign, IL, 2019 **(invited)**.
- Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), Institute of Atmospheric Physics Chinese Academy of Sciences, Beijing, China, 2019, **(invited)**.
- Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), Peking University, Beijing, China, 2019 **(invited)**.
- Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), Southern University of Science and Technology, Shenzhen, China, 2019 **(invited)**.
- Modeling of tropospheric halogen (Cl-Br-I) chemistry: cycling, debromination, and impact, *The 1<sup>st</sup> Regional GEOS-Chem Asia Meeting*, Nanjing, China, 2018.
- Mapping surface air concentrations from OMI and inferring cancer risks: implications for TEMPO, *TEMPO Science Meeting*, Cambridge, MA, 2017 **(invited)**.
- Observing atmospheric formaldehyde from space: validation, intercomparison, trend analysis and public health implications, *AGU Fall Meeting*, San Francisco, CA, 2016.
- Observing atmospheric formaldehyde from space: Validation, intercomparison, trend analysis and public health implications, *Aura Science Meeting*, Rotterdam, The Netherlands, 2016.
- Mapping of surface formaldehyde (HCHO) from space for air quality management, *The 9<sup>th</sup> NASA Air Quality Applied Sciences Team Meeting*, St. Louis University, St. Louis, MO, 2015.
- Indirect validation of new OMI, GOME-2B and OMPS formaldehyde retrievals using SEAC<sup>4</sup>RS data, *The 7<sup>th</sup> International Conference of GEOS-Chem*, Harvard University, Cambridge, MA, 2015.
- Validation of satellite HCHO observations (OMI, GOME-2B, OMPS) using SEAC<sup>4</sup>RS data, *SEAC<sup>4</sup>RS Science Meeting*, Caltech, Pasadena, CA, 2015.
- Anthropogenic emissions of highly reactive volatile organic compounds inferred from oversampling of OMI HCHO columns, *EOS Aura Science Team Meeting 10<sup>th</sup> year anniversary celebration*, College Park, MD, 2014.
- Anthropogenic emissions of highly reactive VOCs (HRVOCs) inferred from oversampling of OMI

formaldehyde columns, *The 6<sup>th</sup> NASA Air Quality Applied Sciences Team Meeting*, Rice University, Houston, TX, 2014.

Math in Nature: finding order in chaos, at Harvard Medical School, *Science in News*, Boston, MA, 2013 (invited).

Variability of HCHO over the United States: Implications for VOCs Emissions, *The 5<sup>th</sup> NASA Air Quality Applied Sciences Team Meeting*, University of Maryland, College Park, MD, 2013.

A spike in electricity demand due to severe summer heatwaves: Increase of SO<sub>2</sub> emissions detected from space, *The 18th Seminar of JSPS-MOE Core University Program*, Beijing, China, 2010.

Estimating of fire emissions in Boreal Siberia by satellite data sets, *The 6<sup>th</sup> Seminar of Environment Modeling and Pollution Controlling*, Beijing, China, 2009.

### Posters

Validation of satellite formaldehyde (HCHO) retrievals using aircraft observations and implication for TEMPO, *TEMPO Science Meeting*, University of Wisconsin–Madison, WI, 2019.

Effect of sea-salt aerosol on tropospheric bromine chemistry, *The 9<sup>th</sup> International Conference of GEOS-Chem*, Harvard University, Cambridge, MA, 2019.

Effect of sea-salt aerosol on tropospheric bromine chemistry, *AGU Fall Meeting*, Washington, D.C., 2018.

Observing atmospheric formaldehyde from space: trend analysis and public health implications, *The 8<sup>th</sup> International GEOS-Chem Meeting*, Cambridge, MA, 2017.

Validation of satellite HCHO retrievals with aircraft (SEAC<sup>4</sup>RS) observations, *Atmospheric Radiation Workshop*, NCAR, Boulder, CO, 2016.

Anthropogenic emissions of highly reactive volatile organic compounds inferred from oversampling of OMI HCHO columns, *AGU Fall Meeting*, San Francisco, CA, 2014.

Indirect validation of GOME-2/MetOp-A and B formaldehyde retrievals using SEAC<sup>4</sup>RS data: Preliminary results, *The 7<sup>th</sup> NASA Air Quality Applied Sciences Team Meeting*, Harvard University, Cambridge, MA, 2014.

Indirect Validation of GOME-2/MetOp-A and B and New OMI formaldehyde (HCHO) retrievals using SEAC<sup>4</sup>RS data: Preliminary results, *SEAC<sup>4</sup>RS Science Meeting*, NIST, Boulder, CO, 2014.

Variability of HCHO over the Southeastern United States observed from space: Implications for VOC emissions, *AGU Fall Meeting*, San Francisco, CA, 2012.

Spikes in electricity demand during severe summer heat waves: Increased SO<sub>2</sub> emissions detected from space, *AGU Fall Meeting*, San Francisco, CA, 2010.

## TEACHING & ADVISING EXPERIENCE

---

### Teaching Assistant

Lab demonstrations/tutoring, grading, exam grading, offering weekly sections

- *Atmospheric Chemistry and Physics*, Graduate course, Harvard University, 12 students, 2017.
- *The Fluid Earth: Oceans, Atmosphere, and Climate*, Undergraduate course, Harvard University, 50 students, 2013.

### Advising Experience

- 3 Undergraduate students
- 2 Graduate students

## PROFESSIONAL SERVICE

---

### Committee Experience

GEMS Science Team Member

2019 –

OMPS (NPP and NOAA-20) Science Team Member	2018 –
TEMPO Science Team Member	2017 –
NASA Aura Science Team Member	2016 –
Chair of weekly Harvard Atmospheric Sciences seminar series	2016 – 2017
NASA SEAC <sup>4</sup> RS Flight Campaign Science Team Member	2012 – 2015
NASA Air Quality Applied Sciences Team Member	2011 – 2015

**Peer Review Journals**

Atmosphere, Atmospheric Environment, Atmospheric Chemistry and Physics, Atmospheric Measurement Techniques, Atmospheric Pollution Research, Environmental Science & Technology, Geophysical Research Letters, Journal of Geophysical Research, Nature Climate Change, Remote Sensing
