SCHOLARLY PROFILE

My research goal is to better understand processes governing the distributions of atmospheric species, and their implications for air quality, public health, and climate. My research program combines **remote sensing**, **modeling**, and **data assimilation** techniques.

My **research interests** include: atmospheric chemistry and its implications, modeling of atmospheric chemistry, and observing trace gases from space.

PROFESSIONAL EXPERIENCE

2019.12 – Present	Assistant Professor, Southern University of Science and Technology
2019.07 – 2019.12	Research Scholar, Harvard-Smithsonian Center for Astrophysics
2017.01 – 2019.07	Post-doctoral Fellow, Harvard University

EDUCATION

2016.12	Ph.D. in Environmental Science and Engineering, Harvard University <u>Advisor</u> : Prof. Daniel J. Jacob
2011.06	MSci. in Environmental Science, Peking University <u>Advisor</u> : Prof. Yu Song
2008.06	B.S. in Environmental Science, Nankai University

AWARDS & GRANTS**Academic Recognition**

Recognized reviewer for <i>Atmospheric Pollution Research</i>	2019
NASA/DOI William T. Pecora Team Award for OMI	2018

Outstanding reviewer for <i>Atmospheric Environment</i>	2017
NASA Group Achievement Award for SEAC ⁴ RS	2015
Graduate with honors, Nankai University	2008
Excellent All-round Student, Nankai University	2005 – 2007

Teaching

Harvard University Certificate of Distinction in Teaching	2013
---	------

Fellowships

Smithsonian Astrophysical Observatory Visiting Scientist Fellowship	2019
Harvard Graduate Consortium on Energy and Environment Fellowship	2014 – 2016
Graduate Scholarship, Peking University	2008 – 2010
Novozymes Fellowship	2007
China National Educational Opportunity Grant	2007
Undergraduate scholarship, Nankai University	2005 – 2006

PRESENTATIONS**Talks**

Validation of satellite formaldehyde (HCHO) retrievals using observations from 12 aircraft campaigns, *AGU Fall Meeting*, 2019, San Francisco, CA, USA.

Satellite remote sensing of trace gases: principles, methods, and applications for air quality studies, *Atmospheric Chemistry Forum* (online), November 30, 2019 (**invited**).

Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), University of Illinois at Urbana–Champaign, Champaign, IL, 2019 (**invited**).

Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), Institute of Atmospheric Physics Chinese Academy of Sciences, Beijing, China, 2019, (**invited**).

Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), Peking University, Beijing, China, 2019 (**invited**).

Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), Southern University of Science and Technology, Shenzhen, China, 2019 (**invited**).

Modeling of tropospheric halogen (Cl-Br-I) chemistry: cycling, debromination, and impact, *The 1st Regional GEOS-Chem Asia Meeting*, Nanjing, China, 2018.

Mapping surface air concentrations from OMI and inferring cancer risks: implications for TEMPO, *TEMPO Science Meeting*, Cambridge, MA, 2017 (**invited**).

Observing atmospheric formaldehyde from space: validation, intercomparison, trend analysis and public health implications, *AGU Fall Meeting*, San Francisco, CA, 2016.

Observing atmospheric formaldehyde from space: Validation, intercomparison, trend analysis and public health implications, *Aura Science Meeting*, Rotterdam, The Netherlands, 2016.

Mapping of surface formaldehyde (HCHO) from space for air quality management, *The 9th NASA Air Quality Applied Sciences Team Meeting*, St. Louis University, St. Louis, MO, 2015.

Indirect validation of new OMI, GOME-2B and OMPS formaldehyde retrievals using SEAC⁴RS data, *The 7th International Conference of GEOS-Chem*, Harvard University, Cambridge, MA, 2015.

Validation of satellite HCHO observations (OMI, GOME-2B, OMPS) using SEAC⁴RS data, *SEAC⁴RS Science Meeting*, Caltech, Pasadena, CA, 2015.

Anthropogenic emissions of highly reactive volatile organic compounds inferred from oversampling of OMI HCHO columns, *EOS Aura Science Team Meeting 10th year anniversary celebration*, College Park, MD, 2014.

Anthropogenic emissions of highly reactive VOCs (HRVOCs) inferred from oversampling of OMI formaldehyde columns, *The 6th NASA Air Quality Applied Sciences Team Meeting*, Rice University, Houston, TX, 2014.

Math in Nature: finding order in chaos, at Harvard Medical School, *Science in News*, Boston, MA, 2013

(invited).

Variability of HCHO over the United States: Implications for VOCs Emissions, *The 5th NASA Air Quality Applied Sciences Team Meeting*, University of Maryland, College Park, MD, 2013.

A spike in electricity demand due to severe summer heatwaves: Increase of SO₂ emissions detected from space, *The 18th Seminar of JSPS-MOE Core University Program*, Beijing, China, 2010.

Estimating of fire emissions in Boreal Siberia by satellite data sets, *The 6th Seminar of Environment Modeling and Pollution Controlling*, Beijing, China, 2009.

Posters

Validation of satellite formaldehyde (HCHO) retrievals using aircraft observations and implication for TEMPO, *TEMPO Science Meeting*, University of Wisconsin–Madison, WI, 2019.

Effect of sea-salt aerosol on tropospheric bromine chemistry, *The 9th International Conference of GEOS-Chem*, Harvard University, Cambridge, MA, 2019.

Effect of sea-salt aerosol on tropospheric bromine chemistry, *AGU Fall Meeting*, Washington, D.C., 2018.

Observing atmospheric formaldehyde from space: trend analysis and public health implications, *The 8th International GEOS-Chem Meeting*, Cambridge, MA, 2017.

Validation of satellite HCHO retrievals with aircraft (SEAC⁴RS) observations, *Atmospheric Radiation Workshop*, NCAR, Boulder, CO, 2016.

Anthropogenic emissions of highly reactive volatile organic compounds inferred from oversampling of OMI HCHO columns, *AGU Fall Meeting*, San Francisco, CA, 2014.

Indirect validation of GOME-2/MetOp-A and B formaldehyde retrievals using SEAC⁴RS data: Preliminary results, *The 7th NASA Air Quality Applied Sciences Team Meeting*, Harvard University, Cambridge, MA, 2014.

Indirect Validation of GOME-2/MetOp-A and B and New OMI formaldehyde (HCHO) retrievals using SEAC⁴RS data: Preliminary results, *SEAC⁴RS Science Meeting*, NIST, Boulder, CO, 2014.

Variability of HCHO over the Southeastern United States observed from space: Implications for VOC emissions, *AGU Fall Meeting*, San Francisco, CA, 2012.

Spikes in electricity demand during severe summer heat waves: Increased SO₂ emissions detected from space, *AGU Fall Meeting*, San Francisco, CA, 2010.

TEACHING & ADVISING EXPERIENCE**Teaching Assistant**

Lab demonstrations/tutoring, grading, exam grading, offering weekly sections

- *Atmospheric Chemistry and Physics*, Graduate course, Harvard University, 12 students, 2017.
- *The Fluid Earth: Oceans, Atmosphere, and Climate*, Undergraduate course, Harvard University, 50 students, 2013.

Advising Experience

- 3 Undergraduate students
- 2 Graduate students

PROFESSIONAL SERVICE**Committee Experience**

GEMS Science Team Member	2019 –
OMPS (NPP and NOAA-20) Science Team Member	2018 –
TEMPO Science Team Member	2017 –
NASA Aura Science Team Member	2016 –
Chair of weekly Harvard Atmospheric Sciences seminar series	2016 – 2017
NASA SEAC ⁴ RS Flight Campaign Science Team Member	2012 – 2015
NASA Air Quality Applied Sciences Team Member	2011 – 2015
