SCHOLARLY PROFILE

My research goal is to better understand the processes determining the distribution of reactive gases and aerosols, and their implications for air quality, public health, and climate. My research program combines **remote sensing**, **modeling**, and **data assimilation** techniques.

My **research interests** include: Atmospheric chemistry and its implications, Monitoring of trace gases from space, and Modeling of atmospheric composition.

RESEARCH EXPERIENCE

- 2018 – Post-doctoral Fellow in Astrophysics, Harvard-Smithsonian Center for Astrophysics
Faculty Advisor: Gonzalo Gonzalez Abad, Physicist
Project: Developing operational formaldehyde products from the OMPS satellites
- 2017 – 2019 Post-doctoral Fellow in Atmospheric chemistry, Harvard University
Faculty Advisor: Daniel J. Jacob, Vasco McCoy Family Professor of Atmospheric Chemistry and Environmental Engineering
Project: A comprehensive coupled model for tropospheric halogen chemistry

EDUCATION

- 2016 Ph.D. in Environmental Science and Engineering, Harvard University
Thesis: Observing atmospheric formaldehyde from space: validation and implications
Advisor: Daniel J. Jacob
- 2011 MSci. in Environmental Science, Peking University
Thesis: Monitoring SO₂ emissions in China using satellites
Advisor: Yu Song
- 2008 B.S. in Environmental Science, Nankai University

AWARDS & GRANTS

Academic Recognition

Recognized reviewer for <i>Atmospheric Pollution Research</i>	2019
Outstanding reviewer for <i>Atmospheric Environment</i>	2017
NASA Group Achievement Award	2015
Graduate with honors, Nankai University	2008
Excellent All-round Student, Nankai University	2005 – 2007

Teaching

Harvard University Certificate of Distinction in Teaching	2013
---	------

Fellowships

Harvard Graduate Consortium on Energy and Environment Fellowship	2014 – 2016
Graduate Scholarship, Peking University	2008 – 2010
China National Educational Opportunity Grant	2007
Undergraduate scholarship, Nankai University	2005 – 2006

PRESENTATIONS

Talks

- Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), University of Illinois at Urbana–Champaign, Champaign, IL, 2019 **(invited)**.
- Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), Institute of Atmospheric Physics Chinese Academy of Sciences, Beijing, China, 2019, **(invited)**.
- Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), Peking University, Beijing, China, 2019 **(invited)**.
- Satellite remote sensing for air quality applications, with a focus on formaldehyde (HCHO), Southern University of Science and Technology, Shenzhen, China, 2019 **(invited)**.
- Modeling of tropospheric halogen (Cl-Br-I) chemistry: cycling, debromination, and impact, *The 1st Regional GEOS-Chem Asia Meeting*, Nanjing, China, 2018.
- Mapping surface air concentrations from OMI and inferring cancer risks: implications for TEMPO, *TEMPO Science Meeting*, Cambridge, MA, 2017 **(invited)**.
- Observing atmospheric formaldehyde from space: validation, intercomparison, trend analysis and public health implications, *AGU Fall Meeting*, San Francisco, CA, 2016.
- Observing atmospheric formaldehyde from space: Validation, intercomparison, trend analysis and public health implications, *Aura Science Meeting*, Rotterdam, The Netherlands, 2016.
- Mapping of surface formaldehyde (HCHO) from space for air quality management, *The 9th NASA Air Quality Applied Sciences Team Meeting*, St. Louis University, St. Louis, MO, 2015.
- Validation of satellite HCHO observations (OMI, GOME-2B, OMPS) using SEAC⁴RS data, *SEAC⁴RS Science Meeting*, Caltech, Pasadena, CA, 2015.
- Anthropogenic emissions of highly reactive volatile organic compounds inferred from oversampling of OMI HCHO columns, *EOS Aura Science Team Meeting 10th year anniversary celebration*, College Park, MD, 2014.
- Anthropogenic emissions of highly reactive VOCs (HRVOCs) inferred from oversampling of OMI formaldehyde columns, *The 6th NASA Air Quality Applied Sciences Team Meeting*, Rice University, Houston, TX, 2014.
- Math in Nature: finding order in chaos, at Harvard Medical School, *Science in News*, Boston, MA, 2013, **(invited)**.

Variability of HCHO over the United States: Implications for VOCs Emissions, *The 5th NASA Air Quality Applied Sciences Team Meeting*, University of Maryland, College Park, MD, 2013.

A spike in electricity demand due to severe summer heatwaves: Increase of SO₂ emissions detected from space, *The 18th Seminar of JSPS-MOE Core University Program*, Beijing, China, 2010.

Estimating of fire emissions in Boreal Siberia by satellite data sets, *The 6th Seminar of Environment Modeling and Pollution Controlling*, Beijing, China, 2009.

Posters

Validation of satellite formaldehyde (HCHO) retrievals using aircraft observations and implication for TEMPO, *TEMPO Science Meeting*, University of Wisconsin–Madison, WI, 2019.

Effect of sea-salt aerosol on tropospheric bromine chemistry, *The 9th International Conference of GEOS-Chem*, Harvard University, Cambridge, MA, 2019.

Effect of sea-salt aerosol on tropospheric bromine chemistry, *AGU Fall Meeting*, Washington, D.C., 2018.

Observing atmospheric formaldehyde from space: trend analysis and public health implications, *The 8th International GEOS-Chem Meeting*, Cambridge, MA, 2017.

Validation of satellite HCHO retrievals with aircraft (SEAC⁴RS) observations, *Atmospheric Radiation Workshop*, NCAR, Boulder, CO, 2016.

Indirect validation of new OMI, GOME-2B and OMPS formaldehyde retrievals using SEAC⁴RS data, *The 7th International Conference of GEOS-Chem*, Harvard University, Cambridge, MA, 2015.

Anthropogenic emissions of highly reactive volatile organic compounds inferred from oversampling of OMI HCHO columns, *AGU Fall Meeting*, San Francisco, CA, 2014.

Indirect validation of GOME-2/MetOp-A and B formaldehyde retrievals using SEAC⁴RS data: Preliminary results, *The 7th NASA Air Quality Applied Sciences Team Meeting*, Harvard University, Cambridge, MA, 2014.

Indirect Validation of GOME-2/MetOp-A and B and New OMI formaldehyde (HCHO) retrievals using SEAC⁴RS data: Preliminary results, *SEAC⁴RS Science Meeting*, NIST, Boulder, CO, 2014.

Variability of HCHO over the Southeastern United States observed from space: Implications for VOC emissions, *AGU Fall Meeting*, San Francisco, CA, 2012.

Spikes in electricity demand during severe summer heat waves: Increased SO₂ emissions detected from space, *AGU Fall Meeting*, San Francisco, CA, 2010.

TEACHING & ADVISING EXPERIENCE

Teaching Assistant

Lab demonstrations/tutoring, grading, exam grading, offering weekly sections

- *Atmospheric Chemistry and Physics*, Graduate course, Harvard University, 12 students, 2017.
- *The Fluid Earth: Oceans, Atmosphere, and Climate*, Undergraduate course, Harvard University, 50 students, 2013.

Advising Experience

- 3 Undergraduate students
- 2 Graduate students

PROFESSIONAL SERVICE

Committee Experience

GEMS Science Team Member	2019 –
OMPS Science Team Member	2018 –
TEMPO Science Team Member	2017 –
NASA Aura Science Team Member	2016 –

Chair of weekly Harvard Atmospheric Sciences seminar series	2016 – 2017
NASA SEAC ⁴ RS Flight Campaign Team Member	2012 – 2015
NASA Air Quality Applied Sciences Team Science Team Member	2011 – 2015

Peer Review Journals

Atmosphere, Atmospheric Environment, Atmospheric Chemistry and Physics, Atmospheric Measurement Techniques, Atmospheric Pollution Research, Environmental Science & Technology, Geophysical Research Letters, Journal of Geophysical Research, Nature Climate Change, Remote Sensing
